

1.11. ENVIRONMENT POLICY

It is the policy of PTC to provide an environmentally friendly and safe working environment for all operations undertaken.

This Policy states the commitment of Senior Management and members of the organization to the implementation and maintenance of waste management, recycling and other sustainability procedures to control and minimize impact on the environment.

This is further defined in the Waste Management and Minimisation Policy.

PTC accepts responsibility for controlling spillage and waste materials resulting from plant and maintenance activities by inspection, reporting and follow up of any hazard or risk identified.

The Company acknowledges its environmental responsibility towards workers, those persons who visit its premises and the general public.

Every worker of PTC has a responsibility for conducting themselves in a safe working manner, ensuring no negative impact on the environment or health of others.

Workers must wear applicable safety clothing, use appropriate equipment and personally ensure activities comply with Jurisdictional Acts/Regulations, Codes, and AS/NZS ISO 14001 by reporting any hazards, unsafe work practices, places, equipment, processes or situations.

Managers and Supervisors have the additional responsibility of monitoring the work environment, identifying training and equipment needs, record keeping, implementing work procedures and investigating incidents as related to the applicable Environmental Legislation.
